MAN WHO NOMINATED U. S. OPENS WATER PASSAGE TO GULF WCODROW WILSON, DEAD

KENTUCKY, PASSES AWAY

This Summer Picturesque and Popular Member of Senate Was Beloved by Both Parties.

Baltimore, Aug. 28.—Senator Ollie M. James, of Kentucky, who has been a patient at Johns Hopkins hospital in this city for several months suffering from a general nervous breakdowa and other ailments, died at 6:55 o'ctock this morning.

In the last week the condititn of the noted Kentucky statesman took a de-cided turn for the worse, and only his great vitality kept him alive so long.
When the end came, Mrs. James,
wife of the Kentuckian, was at the

Washington, Aug. 28. — Oilie M. James was one of the most picturesque and popular members of the United States senate. Of giant physique and striking personality, he was beloved by democrats and republicans alike.

He was a native of the state he represented in the upper house, having been born in Crittenden county, Kentucky, July 27, 1871. He received his education in the common and aca-demic schools of the county and then took up the study of law with his father, L. H. James, and was admitted to the bar when 20 years old. From boyhood he was keenly interested in politics and at the age of 16 served as a page in the Kentucky legislature. Senator James first attracted attention in the legal profession when he was one of the attorneys for Gov. Goebel in his celebrated contest for Kentucky's gubernatorial chair.

Prominent in Conventions. At democratic national conventions Senator James always was a promi-nent figure. He was a delegate to the convention at Chicago in 1896 and delegate from the state at large to St. Louis convention in 1904, and to the Denver convention in 1908 and elected chairman of the Kentucky delegation to all three. He made the speech sec-onding the nomination of William Jennings Bryan and as delegate at large from the state, was elected permanent chairman of the democratic convention at Baltimore, in which he nominated Woodrow Wilson and made the speech justifying the president of his election. He was also permanent chairman of the St. Louis convention four years later when the president four years later when the president was renominated. He had also pre-sided over several Kentucky state conventions

Foch's counter offensive and so astonishingly rapid has been development of the American army, that despite the German "edge" in total numbers the allies have a greater number of fresh reserve divisions than the canemy.

In short, the allied blows in the Marne and in Picardy so tore up the German reserves that the allies are reserved.

Marne and in Picardy so tore up the German reserves that the allies rave ready, fresh, organized reserves to pitch in wherever they're needed, in considrably greater numbers than the

enemy.
The Germans were forced to seventy-one divisions in the Marne battle including reserves, so that now it is carefully estimated that the total number of reserve divisions behind the enemy's line from the sea to Switzerland is fifty-one, of which only twen-ty-seven are fresh. Some of these have already been thrown into the pattle in Picardy.

Italian Front.—The spirit of the troops is higher than at possibly any other time during the war, due to the arrival of Americans and the Italian arrival of Americans and the Italian success in the last major action in this theater. The allies are taking every possible step to prepare against a possible major Hun offensive on this front.

Balkan Front.—A new Greek army of 150,000 men has been added to the allied force. The agrid overselization of

150,000 men has been added to the al-lied forces. The rapid organization of this formidable addition to the allies' troops has been accomplished despite the greatest difficulties and reflects great credit on Venizelos and the Greek people. Here, too, the allies propose to be ready if the Germans "start anything."

An offensive on this front would, of-course, mean the employment of large numbers of Bulgarian troops. Just numbers of Buigarian troops, Just now, the Buigarians are showing a marked disinclination to do any of-fensive fighting. The last German "start" in the Balkans quickly was abandoned, largely because of the dis-position of the war-weary, disgruntled Bulgarians to avoid any scraps that were not forced upon them. This does were not forced upon them. This does not mean, however, that they are likely to quit the Germans as long as they can see a chance for an ultimate Ger-

Men Enough.

(By Arthur Ransome.)

Stockhous. Aug. 24.—(Copyright, N. Y. World.)—I had a talk today with M. Ursenius, who was the official representative of the red Finn government at stockholm. Ursenius is a social democrat, a member of the Finnish Metal Workers' union and has septn two years in America. I asked him what he thought of the possibility of war between the aliles and Finiand.

"I do not believe it," Ursenius answered. "The Finnish army consists of very few men, and is not yet in condition to be forced to do what it does not want to do. It does not want to fight. The food conditions in Finland also are very bad. In the northe frost ruined the potato crop, and has done much damage to corn. The position of Finland is difficult enough without war. By Sept. 15 the government will be operating barges and towboats carrying Alabama coal and other freight down the Waririor river to Mobile bay and thence to New Orleans. It is estimated that the equipment will carry 250,000 tons of coal a year down the river.

The completion of the last great lock—No. 7—on the Warrior river in April, 1915, finished the canalization of the river to a minimum year-round depth of six and a half feet. It made the two forks of the Warrior river navisable above it for forty miles on the Mulberry fork and twenty miles up the Locust fork. The head of navigation on the Mulberry fork is in the heart of the Warrior coal basin, estimated.

NO PAINLESS CUCUMBERS YET
(Thrift Magazine.)

It has been charged that grocers in the fashionable districts of New York selling new cucumbers at 10 cents each have been making a profit of 600 per cent. Unfortunately, the cucumber eaten under these conditions is just as apt to give one a pain in the stomach as in the good old days when the grocer was willing to listen to reason. The invention of a painless cucumber still baffles the scientific mind.
